How to configure BigCommerce plugin for 301pay gateway

Aim of the document

This document is dedicated to BKN301 S.p.A. clients and intends to show step by step how to configure BigCommerce plugin for 301pay gateway.

Pre-requisites

This plugin app connects to 301pay gateway offered by BKN301 S.p.A., therefore, in order to use this plugin, owning an account on 301pay is a necessary condition.

This plugin requires the use of the Optimized one-page checkout. To set this:

1. Go to Advanced Settings -> Checkout
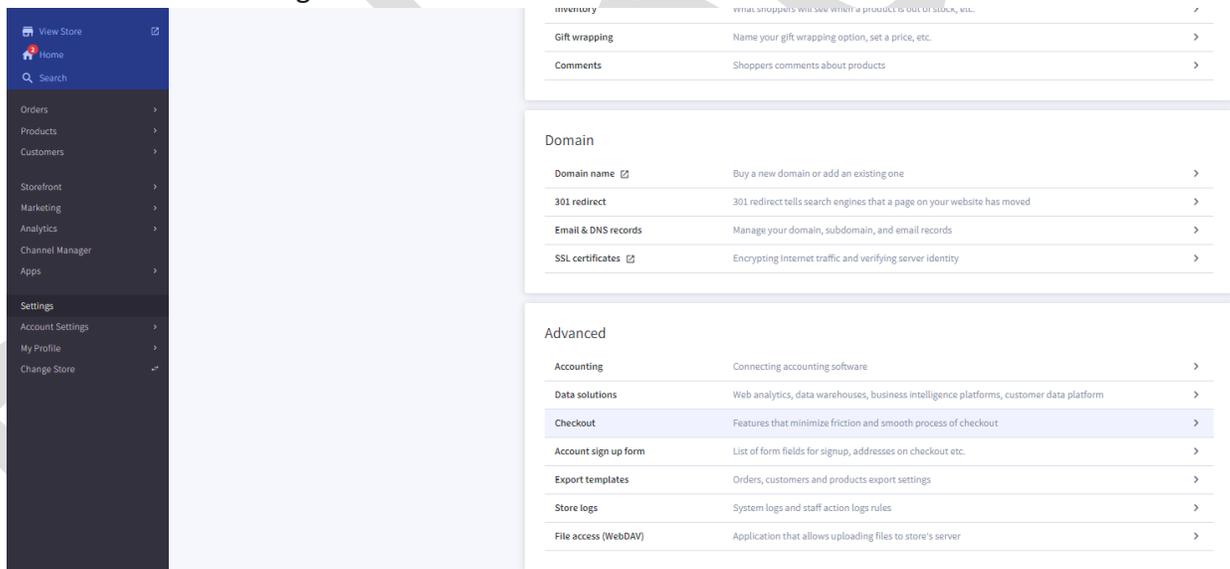

2. Select "Checkout Type" field available, set the field to the Optimized one-page checkout. If you do not see the "Checkout Type" field, you are already using the Optimized one-page checkout.
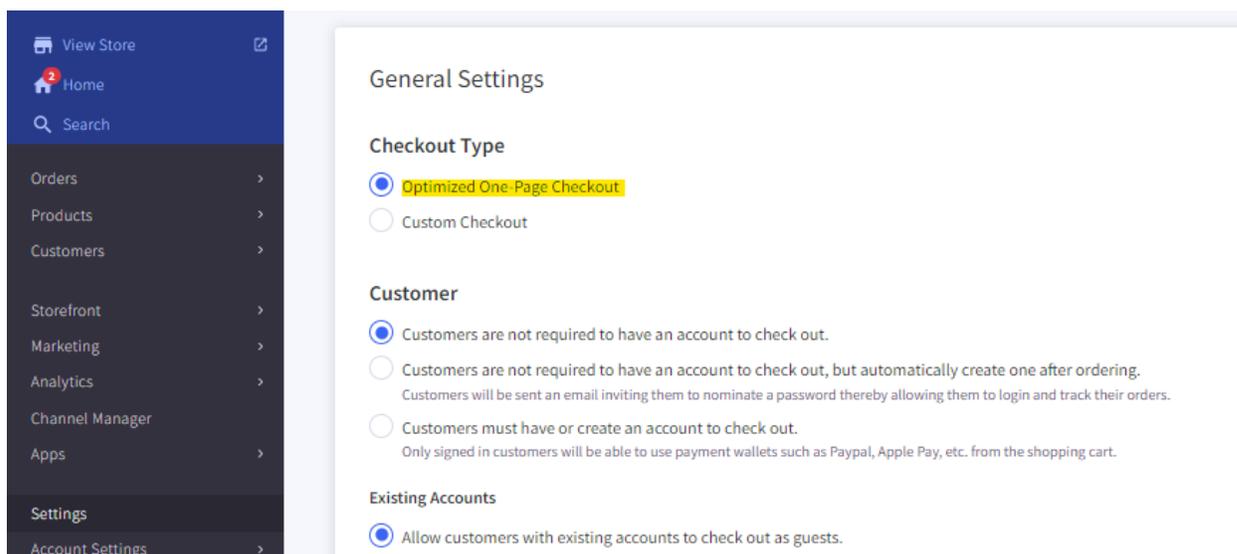

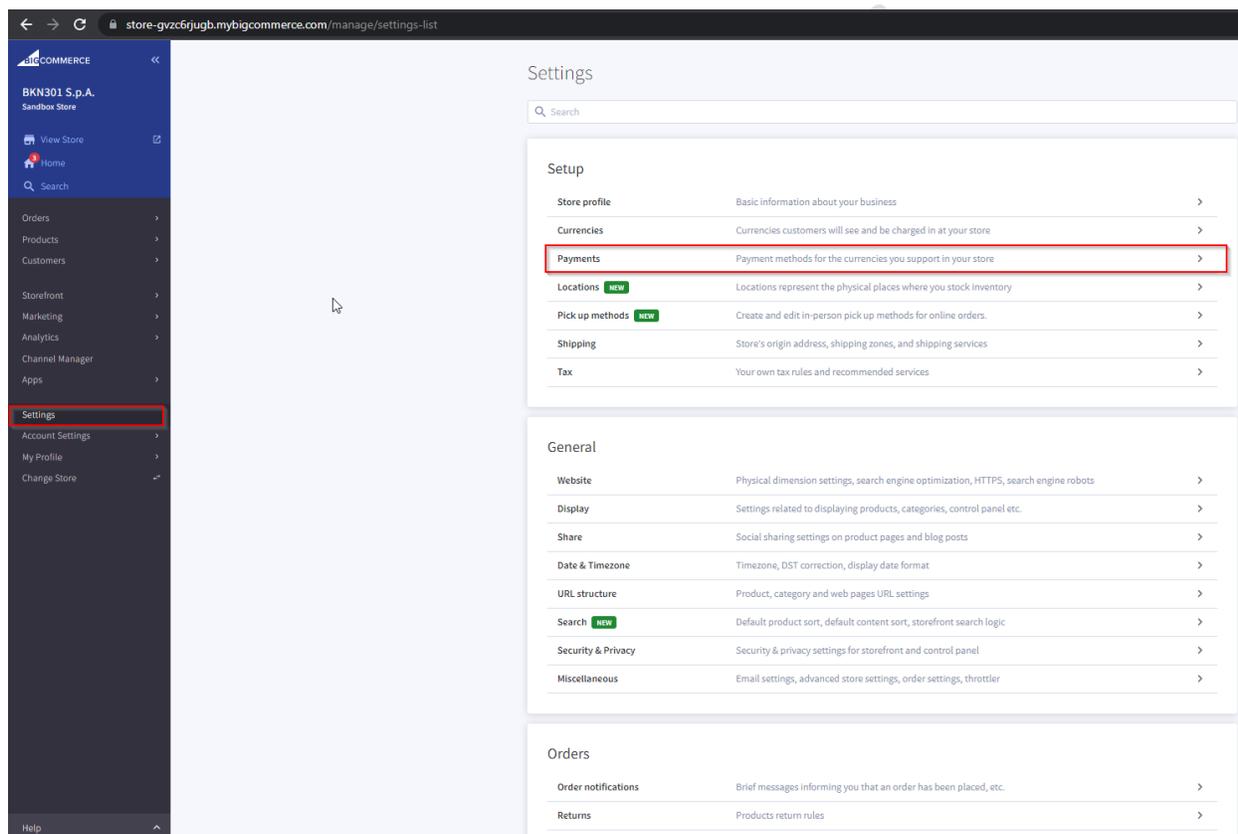

Plugin Installation

3. Navigate to settings > Payments

4. Choose one of the offline payment options that is not being uses, for example "check" and click on "set-up"
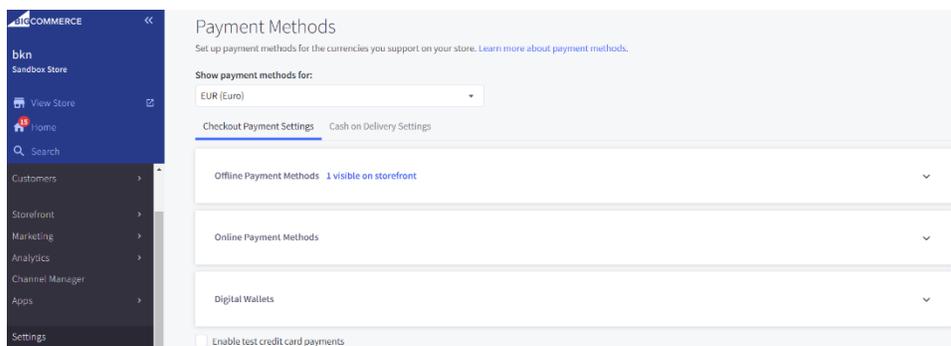

5. Select "show payment methods for" Euro
6. Write the "display name" #BKN
7. Select the countries you want to accept this payment method from. Typically "all countries"
8. Add a description for "Payment Information" that will be shown after the payment will be completed successfully
9. Click on the "save" button

10. Open the marketplace, look for BKN 301 and install the app.
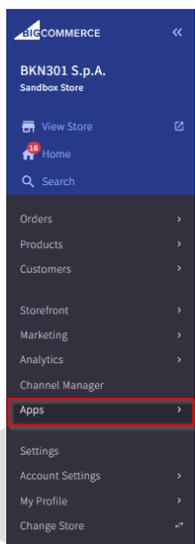

11. When the app is installed, the screen below will appear. Click on "launch"

After the launch, 2 parameters are required: API key and API password.

<u>Get the API key</u>

In order to gather the API key, open the 301pay platform, click on settings > integrations and take the submerchant ID
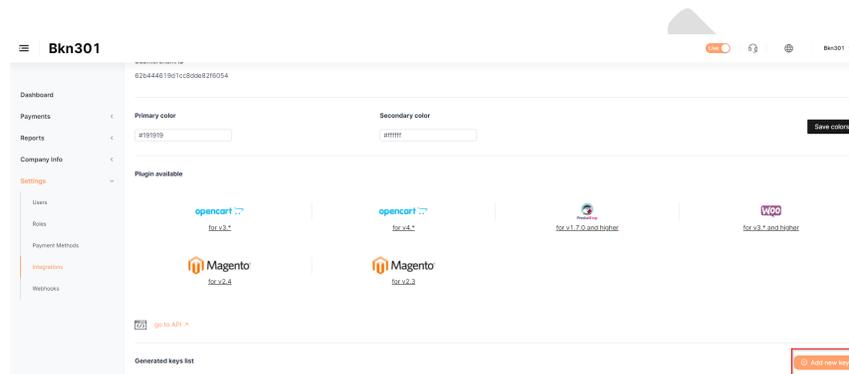

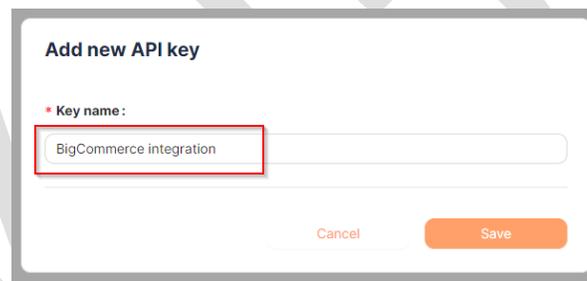

Get the API password.

In order to gather the API password open the 301pay platform, click on settings > integrations and click on "Add new key"

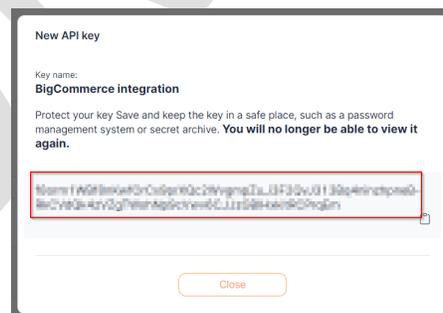

A pop-up "add new API key" appears.
Input a name for the key, for example "BigCommerce integration" and click save

Copy the secret key that appears in the following pop-up

Now, having obtained the API key and API password, back to Bigcommerce BKN301 app with the following steps:

12. enter the API Key
13. enter the API password.
14. Click on "Submit" to activate the app.

API Key

62b444619d1cc8dde82f6054   **12**

Secret key

•••   **13**

Text on payment

Write down text which will appear on payment page

Logo

Scegli file | Nessun file selezionato

☐ Use Sandbox Mode
